Mobility Scooters

ABOUT FREERIDER EUROPE

FreeRider Europe is exclusive importer of FreeRider branded products in continental Europe. FreeRider Europe is based in the center of The Netherlands and has over 10 years of experience in the distribution maintenance and warranty handling for distributors of electric mobility products throughout Europe. In our warehouse we have most products, spare parts and accessories in stock, so we can provide you with fast delivery and excellent service. We offer an assortment of mobility scooters on three and four wheels. This includes small maneuverable scooters for indoor use and bigger, faster scooters with a reach of 70 kilometers for outside use. We also offer small, foldable scooters which fits easily in the trunk or on the backseat of a car.

FreeRider designs and manufactures its own designs and has developed precision products since we were established in 1995. We believe in producing quality products working closely with our customers around the world. Complete after sales service and training is available to educate your engineers to support the FreeRider product range. At FreeRider we go beyond 100% effort, we work together with our importers, suppliers and customers providing the best product range and services. Working together as a team we aim to create a better future for everyone.

FreeRider mobility scooters are used worldwide bringing freedom and independence to many elderly and disabled customers. The mobility scooters are being produced in our 8.300 square meters factory. But with the continued growth of sales worldwide and with new product development, FreeRider is already planning its next move.
